Proven, multi-domain solutions

We are at the cutting edge of modern defense, developing systems which are scalable, interoperable, open, and integrated directly into civil and military systems.

Infrastructure Protection

Airports, Sea Ports, Stadiums, buildings – we stand ready.

Base Protection

Protecting warfighters and coalition assets in CENTCOM, EUCOM, PACOM and more.

Mobile Force Protection

Engineered to protect highly mobile assets such as helicopters, convoys and ships.

Cloud-Based Command

Automated software and robotic systems to reduce operator and logistical requirements.

Over a decade of innovation to defend against emerging threats

Systems that have been tested, trusted, and scaled by military and civilian organizations in over 15 countries around the world to defend against UxS and emerging autonomous threats

Trusted U.S. Partner for Urgent Needs

Liteye develops advanced radars to conduct perimeter surveillance in support of U.S. forces stationed along contested border area.

January 2012

Defense of Mosul, Iraq

Liteye C-UAS solutions successfully detect and defeat over 1,000 ISIS drones in the battle to retake Mosul, Iraq.

August 2017

Protecting Changi Airport

Changi Airport in Singapore selects Black Sage to provide C UAS support to civilian aviation and integrate its open architecture software, DefenseOS.

August 2020

U.S. Army, JCO & SOCOM Certifications

Black Sage and Liteye receive the recommendation of the US Army Joint C-UAS Office (JCO) and SOCOM community following multi year testing of detect, track, and defeat capabilities.

September 2022

Global Presence

Today, High Point C-UAS systems are deployed in over 15 countries around the world in support of government and civil security missions against threats from air, land, or sea.

C- UXS Layered Defense

(In a right sized package)

EO IR

Daylight and Infrared optics to detect, track, and classify UAS with real-time feedback

RF MITIGATION

Radio frequency jammers to disrupt UAS communication and GNSS navigation

PASSIVE RF

Receiver antennas to detect UAS communications

RADAR

Ku and K band 3D radars to detect, track, & classify

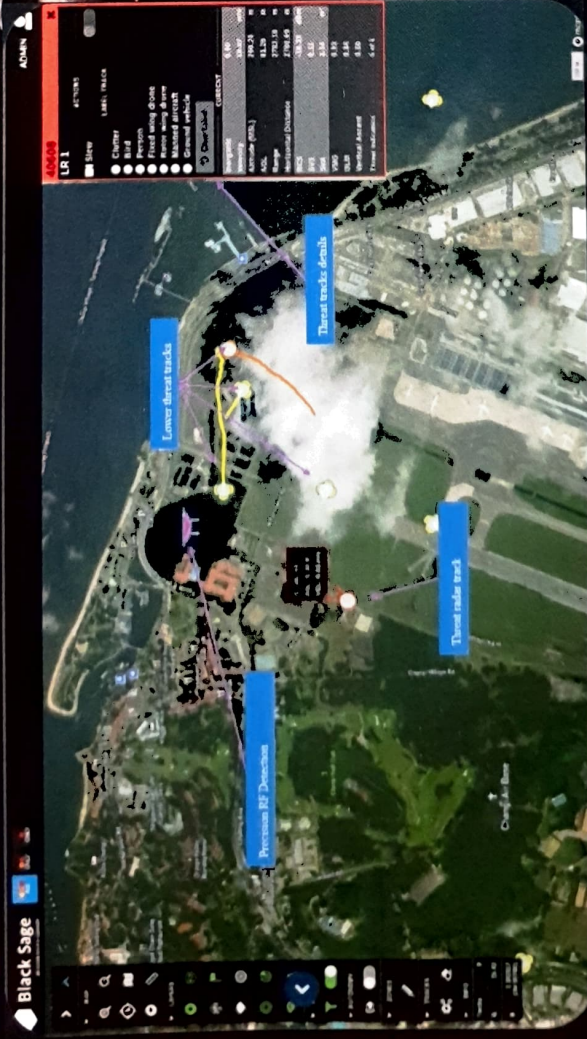

Product Description	Group 1 UAS	Group 2 UAS	Group 3 UAS
<ul style="list-style-type: none"> RF & Cyber Wifi / GPS Jamming Laser designation 	+	+	+

DefenseOS

A defense ecosystem that is interoperable, modular, and open architecture. An intuitive and scalable operator interface that enables insights and action at machine speeds.

Utilizing DefenseOS, we have approached defense ecosystems, including JADC2, with an interoperable modular and open architecture which is intuitive and scalable.
